

Green Guest – 10 Point Plan

Here at the Beachcroft we aim to embrace our natural environment and make changes to our business providing a positive impact on local sustainability. Whilst we strive to improve our green credentials a huge part of our business is reliant on our guests making sustainable choices throughout their stay. Our dedicated green team have put together a 10 point plan for 'Green Guests' wishing to help our journey to net zero – Thank you for your support

1. Transportation

Whilst all guests who visit make their own choices in how they arrive here at the Beachcroft. We want to highlight the great local public transport options. Guests can leave their car (plugged in to one of our Electrical charge points or not) and set off to explore our immediate our wider local area. Popular visitor destinations include Brighton, Portsmouth, Chichester & Arundel can all be reached easily by public transport by either [Southern Rail](#) or [Stage Coach 700 Bus service](#)

2. Up On Arrival

We know some journeys can be long! Most guests like to enjoy a snack or refreshments whilst journeying to us. Please consider using one of our dedicated recycling bins for any rubbish you wish to discard.

3. Keeping Refreshed Whilst Staying

Throughout your stay we provide a can of sparkling Southdowns water for every arrival, Guests are more than welcome to re-fill re-usable drinking bottles either at our refreshment station located in reception, using the tap water in the room which is perfectly safe to drink, or speaking to one of the team in our F&B outlets who would be happy to re-fill bottles for you. We also offer to provide tea & coffee using your own re-useable mug, we will even wash it up for you after use!

4. Throughout Your Stay

Please take the time to consider how your stay can further support our green targets. Consider reusing bath or hand towels more than once. Let us know throughout your stay if you would rather housekeeping didn't service your bedroom. Or for longer stays perhaps you don't need the linen changed after only 4 nights?

5. Water Conservation

A few simple ideas for reducing water usage could include, showering rather than using the bath tub. As part of our ongoing commitment to reducing water usage as we upgrade our facilities we are replacing all our bath tubs with spacious shower cubicles. Whilst you brush your teeth please consider if the tap needs be running? Or when using the in room kettle, consider how much water is needed?

6. Heating Systems

Being a large building we have several boilers that facilitate both heating and hot water. We aim to keep our guests happy and the boilers on a timed system which hopefully works for most guests. The heating in each room can be thermostatically controlled, either by using the thermostatic valve (1 to 6 – 6 being most heat) or using the digital thermostat helping regulate a more consistent temperature. We do ask all guests to consider if it is necessary to have the heating on and the windows open?

7. Our Indoor Pool

Reception are more than happy to provide towels for guests using our swimming pool. Before you leave the pool area please consider if you have another slot booked either later in the day or the following day whether you can reuse your towel?

8. Recycling Whilst Staying

As part of our green policy we are trying to encourage all guests to separate mixed recycling from general waste. Each room has a separate compartment dedicated for mixed recycling. Throughout the building you will find recycling points, please think and help us recycle more waste.

9. In Room Supplies

We are moving away from single use plastic as best we can, you will find our products are environmental friendly and phosphate free. Please do leave the larger bottles of body wash, shampoo & moisturiser as these are sanitised and refilled for the next guest. Other complimentary products are provided in cardboard recyclable packaging please do remember to use the recycling bins provided.

10. – Coast & Country

We hope guests make the most of lovely beach and countryside whilst visiting. Please help us keep our environment lovely whether enjoying fish and chips or pizza on the beachfront or picnicking in the Southdowns please remember to take your litter with you!
